

TIMETABLE ARRANGEMENT: Annual; 1st Semester

CREDITS: 6

COURSE TEACHER(S): Dr Calvin P TRIBBY

ASSESSMENT:

| EXAMINATION 60 % | COURSEWORK 40 % |
|------------------|---|
| • 2 hours | • 1 group research project • 1 individual research essay |

OBJECTIVES:

This course provides an understanding of the spatial structures and development of transport systems from a people-oriented geographical approach.

COURSE SYNOPSIS:

This course provides an understanding of the spatial structures and development of transport systems from a people-oriented geographical approach. This approach emphasizes the role of people in determining the evolution and use of transport systems and the role of the transportation systems in serving and changing our daily life through improving accessibility and mobility. The course will cover the fundamentals of geographical analysis on transport, briefly introduce transport planning, and cover sustainable transport. Case studies of public transport, walking and bicycling, and freight transport networks provide explanations about the mechanisms and dynamics of transport systems in different geographical situations, and how they interact with local and global development.

LECTURE TOPICS:

- Fundamental aspects of transportation geography
- Introduction to the evolution of transportation systems
- Issues of transport and development
- Transport planning: introduction to modeling
- Geographical analysis of transport system analysis by mode
- Geographical scales and issues of intermodal transport
- Information and communication technologies (ICTs) and travel behaviour
- Sustainable transport, pollution and energy
- Sustainable transport and climate change

RECOMMENDED READING LIST:

- Knowles, R., Shaw, J. and Docherty, I. (eds.) (2008): Transport Geography. Motilities, Flows and Spaces. Oxford. Blackwell.
- Rodrigue, J. P. (2020). The geography of transport systems. New York. Taylor & Francis.
- William K. Black (2010) Sustainable Transportation: Problems and Solutions. New York. Guilford Press.

| Course Learning Outcomes (CLOs) After completing this course, students would be able to: | | Alignment with Programme Learning Outcomes (PLOs)* | | | | | | Course Assessment Methods |
|---|---|--|---|---|---|---|---|--|
| | | 1 | 2 | 3 | 4 | 5 | 6 | |
| 1 | understand transport as a key element in development at any geographical scale | | ✓ | | | | | Group research project, research essay and examination |
| 2 | comprehend individual modes of transport and their role in changing mobility and accessibility patterns | | | | ✓ | | | Group research project, research essay and examination |
| 3 | understand the vast impact of transport on globalisation and sustainable development | ✓ | | | | ✓ | | Group research project, research essay and examination |
| 4 | use basic methodologies of geographical analysis of transport systems | | | | | | ✓ | Group research project, research essay and examination |
| 5 | decompose a complicated real-world system from different perspectives | | | | ✓ | | | Group research project, research essay and examination |
| 6 | comprehend a networked phenomenon that affect geographical patterns of our daily life | | | ✓ | | | | Group research project, research essay and examination |

*Geography Major Programme Learning Outcomes (PLOs)

In order to meet the demands and challenges in this dynamic and ever-changing world, the Department has designed a series of well-structured and contemporary courses to cater to the different interests of students. Its courses are designed to align with the University's educational aims which hope to nurture future generations not only with a critical and intellectual mindset, but also with a passion to contribute to society in general.

After completing the programme, Geography Major students should be able to:

- PLO1** critically analyse the geographical aspects of the relationship between people and the natural environment;
- PLO2** demonstrate and develop an understanding of how these relationships have changed with space and over time;
- PLO3** identify, collect and utilize primary and secondary data to investigate and analyse the issues and problems facing people, places and society;
- PLO4** integrate, evaluate and communicate information from a variety of geographical and other sources;
- PLO5** participate in promoting social, economic and environmental sustainability at the local, regional and global scales; and
- PLO6** effectively apply a range of transferable skills in academic, professional and social settings.
