OBJECTIVES:
The course will help students to understand major aspects of environmental management as a means for protecting natural and man-made environments.

COURSE SYNOPSIS:
The course will introduce a range of key issues, concepts, principles and methods in environmental management. The major components, processes and attributes to environmental management will also be elaborated. The roles of civil society, market mechanism and government regulations in environmental management will be examined. Real-life examples from Hong Kong, China, and overseas countries will be discussed to illustrate how integrated approaches should be applied for identifying optimal options in environmental management decision-making processes.

LECTURE TOPICS:
• Command-and-control principle: Environmental laws, standards, and regulations
• Environmental impact assessment (EIA)
• Market-based mechanisms in environmental management
• Voluntary initiatives in environmental management
• Environmental management systems (EMS)
• Environmental management in Hong Kong and China

RECOMMENDED READING LIST:
**Course Learning Outcomes (CLOs)**

After completing this course, students would be able to:

*Geography Major Programme Learning Outcomes (PLOs)*

In order to meet the demands and challenges in this dynamic and ever-changing world, the Department has designed a series of well-structured and contemporary courses to cater to the different interests of students. Its courses are designed to align with the University’s educational aims which hope to nurture future generations not only with a critical and intellectual mindset, but also with a passion to contribute to society in general.

After completing the programme, Geography Major students should be able to:

**PLO1** critically analyse the geographical aspects of the relationship between people and the natural environment;

**PLO2** demonstrate and develop an understanding of how these relationships have changed with space and over time;

**PLO3** identify, collect and utilise primary and secondary data to investigate and analyse the issues and problems facing people, places and society;

**PLO4** integrate, evaluate and communicate information from a variety of geographical and other sources;

**PLO5** participate in promoting social, economic and environmental sustainability at the local, regional and global scales; and

**PLO6** effectively apply a range of transferable skills in academic, professional and social settings.
